Treasure Island

I thought Australian politicians loved the Australian people?

Our children's birthright is being stolen.
All the gas and mineral wealth should belong to the Australian people.
All profits should go back into investing in our people so there is no problem with education and healthcare—like Palmerston Hospital closing the hydro pool, leaving no access for the elderly and disabled. Schools are under-resourced, healthcare is underfunded, and public housing and education are suffering.

We must take back what's ours.
Nationalize our resources—everything should be owned by Australians, for the people, by the people. No Australian politician or foreigner should have shares or profits from our children's birthright.

They are destroying our future with their international corporate greed. This should be our Treasure Island, benefiting all of us—not just a few wealthy Australians and foreign entities.

For the many, not the few. We need an Australian sovereign wealth fund, similar to Norway's.

Rise up, wake up, stand up for your rights!

\$1.9 billion

if we have to pay for this. Then it should be 100% Australian owned by the people of NT.
